## Job post

### Innovation Intern

EFFEKT Arkitekter ApS  
Blågårdsgade 8, 2. Sal  
DK-2200 København N  
Tel. (+45) 35 35 36 31

Side 1 af 2

#### **EFFEKT is seeking an ambitious and dedicated intern to join our Innovation team.**

In the innovation team we are primarily working with research and design projects that work to scale building industry activities - from urban scale to material level - within planetary boundaries. We work to translate research into actionable and operational solutions for the building industry.

We are looking for a creative, systems-thinker who has a broad interest in sustainability and the building industry to join our team. Your work will consist of research, communication of new knowledge, and operationalization of the findings in tangible building solutions.

You will be an integral part of the small innovation team and will have a chance to steer on-going projects. You can expect daily support and feedback from the team but must be able to work independently. You will be given both responsibility and ownership over the on-going projects. For these reasons, you must be:

- Curious and motivated to gain new knowledge.
- An expert communicator, both written and visual
- Organized and able to steer research and design process.
- Most importantly, you see yourself as a change-maker, passionate about sustainable transition.

#### **Qualifications and competencies sought:**

- You are a master's level student within the fields of sustainability, innovation, or design engineering.
- You are fluent in English, oral as well as written. Skills in Danish or another language is a plus, but not a requirement.
- You have experience in applying design thinking, sustainable transition, and / or systems thinking in project work.
- You have foundational knowledge on life cycle thinking and experience doing basic life cycle assessment.
- You have strong skills in translating knowledge through visual communication and you are an experienced user of Adobe CS.
- Experience in the building industry isn't a requirement, but certainly an advantage.
